## UNIKOO LIMITED WARRANTY:

- UNIKOO warrants its commercial hardware for a period of 2 year from the date of purchase. UNIKOO commercial hardware is warranted against material and workmanship defects.
- All warranty claims are subject to inspection by UNIKOO before providing a resolution against the warranty claim.
- This warranty is void if it is determined after UNIKOO inspection that the Hardware has been improperly installed and/or maintained in a manner not conforming to UNIKOO guidelines and instructions provided at time of purchase.
- UNIKOO's responsibility to provide a resolution under said warranty will be limited to a refund of purchased price or provide a replacement for the hardware.
- The refund or replacement will constitute UNIKOO's limited liability and obligation for any and all defective material/workmanship for said warranty claim.
- THIS WARRANTY IS EXCLUSIVE AND UNIKOO MAKES NO OTHER WARRANTY, EXPRESSED OR IMPLIED.

## TO CUSTOMER

Thanks for buying our product, in order to ensure that you can fully understand the functions of the products you purchase, please be sure to read the instructions and keep them properly for future reference.

## PUSH BUTTON

| Button icon | Function | Detailed instructions  | Remarks |
|-------------|----------|--|---------|
| /           | Light    | <p>1. When powered on and in standby mode, a quick hand-wave in front of the sensor window turns the light on. Wave your hand again to turn off the lights.</p> <p>2. While the light is on, holding your hand in front of the sensor window allows continuous dimming (brightness adjustment), which stops once the hand is removed.</p> <p>Repeating this action (holding the hand again) will reverse the dimming direction (e.g., from brightening to dimming)</p> |         |

## INSTALLATION INSTRUCTION

1. Use a measuring ruler to measure the hole and size on the back of the mirror. Draw the hole position on the wall. Adjust the mirror with a leveler.
2. Use an electric drill to drill holes in the solid cement wall that match the expansion plugs
3. Put the expansion plugs with screws in the hole.
4. Place the mirror into the screw to the wall. Measure the horizontal and vertical of mirror with a leveler. If there is any error, it can be adjusted by adjusting the screws. Switch on the power and test whether the lamp circuit is unblocked.
5. Switch off before installation. Professional electrician for installation and maintenance only.
