Self-tapping Screw: 1PC (Fixed handle snap)

Product Overview:

Double Sided Shop Glass Carts are the answer to all your in-shop fabrication, storage, shipping, and receiving needs. Crafted from durable steel with an open frame design, these carts ensure easy product inspection at a glance. Seamlessly transition products between production stages, receive vendor goods, stage items for shipping, or prepare for job site delivery with ease. All three sizes feature a hot-dipped galvanized finish, along with heavy rubber lining on all glass touch points for added protection.

GLASS CART ASSEMBLY DIAGRAM

First Step: Install four caster wheels, with two caster brakes positioned on the side with the handle.
Screw : M10X25

Second Step: Start by aligning the A frame with the base, but hold off from tightening the screws just yet.
Screw: M10X65

Step 2: install the A frame, Tighten screws

Third Step: Install the pull rod after all screws have been installed. Then proceed to tighten the screws.
