**Product Name:** Plastic Horseshoe Shims  
**Catalog Numbers:** HS216, HS28, HS44  
**Company Contact Information:** 4610 Santa Anita Ave. El Monte, CA 91731  
626-522-1551

## Safety Data Sheet Exemption

This statement serves as a notification that the plastic shims mentioned above are categorized as "Articles" according to the OSHA Hazard Communication Standard. Consequently, they are exempt from the standard's provisions, and a Safety Data Sheet is not required. Safety Data Sheets are mandatory for materials or products deemed hazardous, but plastic shims are not considered hazardous. This exemption is in accordance with Section 1910.1200(b)(6)(v) of the standard, which defines an "Article" as a manufactured item:

That is produced in a specific shape or design during its manufacturing process. Whose end-use functions are dependent, wholly or partially, on its shape or design.

That does not release or result in exposure to hazardous chemicals under normal usage conditions.

All the plastic shims mentioned meet these criteria, making them fall under the "Article" classification as per the standard.
