STEP 1

Installation of upper horizontal header

Product Height	A	B
60"(1524mm)	55 1/2"(1411mm)	7/8" (22mm)
66"(1676mm)	61 1/2"(1563mm)	
72"(1828mm)	67 1/2"(1716mm)	
76"(1930mm)	71 1/2"(1817mm)	
79"(2006mm)	74 1/2"(1894mm)	
80"(2032mm)	75 1/2"(1919mm)	

*A=product height-113mm(4 1/2")

*Use a spirit level or laser level to measure the wall. Once aligned horizontally, attach the height template to both sides of the wall.

*Mark these locations with a pen, ensuring precision and clarity for accurate positioning during subsequent drilling.

*Securely attach a 5/16" drill bit to the drill, ensuring it's firmly fastened. Then, carefully drill a hole at the marked location. When drilling into porcelain tiles, maintain a slow speed to prevent cracks.

*Insert the anchor into the hole.

*Disassemble the wall fittings.
*Put in the bumper and tighten the screws.

*Please note that the slot for mounting the accessory remains in the upper position.

STEP 2

Installation of upper horizontal header

*Measure the desired length and use a saw to accurately cut the aluminum to size, ensuring the edges are smooth and flat.

STEP 3

Installation of upper horizontal header

*Put the wall fittings in and torque the 4 screws to the right slot.

*Please put the groove of the accessory towards inside.

REMINDER

* Place the finger pull glass on the **inside** of the shower enclosure where the shower head is located, and place the towel bar glass on the **outside** of the enclosure.

STEP 4

Installation of pulley fittings

*Disassembly of pulley fittings.

*Place the pulleys in the correct order on the holes in the glass door, after tightening the pulleys using the screws and placing the inner glass inside. Please use a mat or soft cloth on the placement area to protect the door and the floor.

STEP 5

Installation of bottom retainer

- *Secure the glass to the track first to ensure accurate installation of the bottom guide.
- *After confirming the position of $L/2$, place the bottom retainer in the middle position, measure with a level and make sure the glass is in horizontal and vertical level, then mark with a marker.
- *Drill the holes using a 1/4" drill bit, insert anchors in the holes, tighten the bottom retainer with screws, and close the decorative cover to complete the installation.

STEP 6

Installation of the glass door

- *When installing the glass sliding door onto the sliding track, make sure that both wheels are correctly fitted to the sliding track and the glass is correctly fitted into the bottom fixer slot. Gently push the glass to check that it is sliding smoothly and also to ensure that it can be used safely.

STEP 7

The correct method of installing glass

*If you notice that the glass is not level at the top and bottom, adjust the eccentric screw on the wheels to ensure the glass is level.

STEP 8

Installation of anti-jump nails

*After ensuring the glass is level, install anti-jump nails to prevent the glass from accidentally falling and causing injury.

STEP 9

Install plastic seal along the edges of both glass panels

STEP 10

Installation of towel bar and knob

Towel bar installs on outside

Knob installs on inside

WARNING: Risk of SERIOUS INJURY. Do NOT install the towel bar, handle, or knob before the door is fully mounted. Lifting the door using these components can cause the door to shatter, resulting in severe injury.

STEP 11

Installation of the water stopper in the bottom fixture recess

*Measure the desired length and use a saw to cut the threshold to the correct size. Ensure the edges are smooth and flat.

*To ensure the threshold functions properly, apply glass adhesive to fill the bottom gap completely. Covering the entire bottom surface.

*Install the water stopper in the bottom fixture recess and finish the installation by applying glass adhesive around the edges.

STEP 12

*Wait 24 hours for the glass adhesive to cure.
