## STEP 1

### Install stainless steel frame on the wall and the bottom

\*Take out the wall stainless steel frame from the packaging. Position it against the wall, ensuring vertical alignment using a level. Use a marker to mark the hole positions.

\*Use a 1/4" drill bit to drill the holes.

\*Insert anchors into the holes.

\*Take out the lower stainless steel piece out of the packaging and measure the required dimensions. To ensure the guide block is centrally mounted, use the center point as a reference and measure equally to both sides. Once you get the symmetrical measurements, cut the stainless steel piece to the correct size using a saw, ensuring the edges are smooth and even.

\*Take out the wall stainless steel frame from the packaging. ensure uniform positioning on both the left and right sides. Use a level to confirm vertical positioning, then mark the hole locations with a marker.

## STEP 2

### Install stainless steel frame on the wall and the bottom

\*Take out the center glass bottom guide from the packaging. Position it on the bottom stainless steel track, secure it with screws, and then press down the cover plate to finish.

\*Take out the side glass guide block. Place it on the bottom stainless steel track and secure it with screws, and then press down the covers to finish. Repeat the process on the other side.

## STEP 3

### Installation of the top rail

\*Take out the top rail from the packaging. Measure the required length and cut the stainless steel bar to the correct size using a saw, ensuring the edges are smooth and even.

\*Insert the top rail into the center of the wall stainless steel frame on both sides.

## STEP 4

### Installation of the left glass door pulley

\*Before the installation begins, determine how the glass will be installed based on the location of the showerhead. Make sure the small knob is mounted on the inside of the bathroom near the showerhead, while the long handle is mounted on the outside for towel access.

\*Start by disassembling the pulley wheel.

\*Take two pulley accessories, ensuring correct orientation for outer installation.

Insert them sequentially into the glass holes, then tighten the screws using a hexagonal wrench.

\*Securely position the glass door in the outer track, ensuring both side pulleys are correctly attached to prevent any risk of detachment. Ensure the glass is fully seated in the bottom guide at the base.

\*Use a level to check the vertical alignment of the glass. If it's not vertical, adjust the eccentric on the pulley to ensure it aligns correctly before tightening the screws with an Allen wrench.

## STEP 5

### Installation of the right glass door pulley

\*Before the installation begins, determine how the glass will be installed based on the location of the showerhead. Make sure the small knob is mounted on the inside of the bathroom near the showerhead, while the long handle is mounted on the outside for towel access.

\*Start by disassembling the pulley wheel.

\*Take two pulley accessories, ensuring correct orientation for inner installation.

Insert them sequentially into the glass holes, then tighten the screws using a hexagonal wrench.

\*Position the glass door in the inner track and use a level to ensure it is perfectly vertical.

\*If you find that the glass is wobbling after installation, can adjust the screws on both ends of the guide to tighten it.

\*To ensure safe usage, make sure that anti-jump fittings are properly installed at the pulleys.

\*Choose the cover marked with the letter "L" and insert it into each of the pulleys located on the left side.

\*Choose the cover marked with the letter "R" and insert it into each of the pulleys located on the right side.

## STEP 6

### Installation of towel bar and knob

\*Attach pull handle to the outer glass. Insert the parts into the glass holes one by one, then tighten the inner screws using an Allen key.

\*Attach knob to the inner glass. Insert the parts into the glass holes one by one, then tighten the outer screw using an Allen key.
